

Krieg & Fischer Ingenieure GmbH is a globally operating engineering company with a focus on the planning and construction of biogas plants. The company has longtime experience in the field of biogas technology.

Currently, we are looking for a:

Process-, Environmental-, Energy or Civil Engineer

for the role of a biogas project manager at our office in Göttingen. This is a permanent, fulltime role.

Responsibilities / tasks: Designs and tenders
 Evaluation of quotations, preparation and assistance in the awarding of contracts
 Project management in Germany and abroad
 Acceptance of constructions and start-up at site
 Documentation

Required Skills: University degree in the above mentioned fields or comparable qualification
 Fluent English
 Experience with common software products

Preferred skills: Engineers with practical experience in plant construction

The successful candidate will join a highly qualified, enthusiastic young team of engineers in an open and pleasant work environment. To learn more about our company, please have a look at our homepage www.kriegfischer.de. Your contact person is Mr. Raphael Thies.

If indicated, your application will be treated confidentially. Please send your application to:
