

Reference list - Studies / Research projects-

Year	Location	Report	Content
2020	Germany	Study	Site evaluation for a biogas plant for the digestion of biowaste
2019	Germany	Study	Study on the industrial appearance of biogas plants
2018	Germany	Research project	Participation in a research project on the production of activated carbon and energy sources from residual biomass
2016	Argentina	Study	Study on the digestability of thin stillage
2016	Germany	Study	Study on the concept development for the pretreatment of biowaste
2014	Japan	Feasibility study	Study on the technical feasibility of a prospective biogas plant in Japan
2014	France	Study	Preparation of studies on the fermentability of sugar beet pulp silage and vinasse in France
2013	Germany	Study	Investigation on the fermentability of solid waste of the sugar industry
2013	Japan	Study	Comparison of different biogas upgrading systems in Japan
2013	South Africa	Technical-report	Technical report on a biogas concept for the digestion of organic waste in South Africa
2013	The Netherlands	Technical-report	Technical Evaluation Report for a biogas plant in The Netherlands
2013	Denmark	Technical feasibility study	Technical feasibility study on a biogas concept for the digestion of by-products of a sugar factory in Denmark
2012	Germany	Study	Implementation and evaluation of a test operation for biowaste treatment for a sewage treatment plant in Germany
2012	Finland	Study	Study on dry fermentation in Finland
2012	Germany	Study	Study on the use of the Gorator in biogas plants in Germany
2012	China	Guidelines	Participation in developing a biogas guideline for Chinese biogas plant operators
2010	Serbia	Study	Study and preplanning of the re-startup of a cofermentation biogas plant in Serbia
2009	Panama	Technical-report	Implementation of a feasibility study on fermentation of banana waste in Panama
2008	Germany	Study	Preparation of a study on marc-fermentation in Germany
2008	Germany	Study	Preparation of a study on dry fermentation in Germany
2008	Germany	Study	Study on a combined bioethanol-biogas plant in Saxony-Anhalt
2008 - 2011	Germany	Research project	Participation in a research project of the "Fachagentur für nachwachsende Rohstoffe" about mono fermentation of corn-silage grown on locations with different soil conditions. "FKZ 22014308"
2008	Canada	Study	Study on a biogas plant in Canada
2008	Germany	Technical-report	Preparation of a feasibility study for evaluation of the different options for the fermentation of waste in Baden-Württemberg
2008	Germany	Study	Preparation of a study in Germany on fermentation of horse manure
2007	Germany	Study	Pre-Study on fermentation of sugar-beets in a biogas plant
2007	Germany	Study	Preparation of a study on a technical comparison of main components of biogas plants
2005	Germany	Technical-report	Preparation of a feasibility study for the extension of a biogas-plant
2004	Spain	Study	Preparation of a study on mono fermentation of residues from the olive processing in a biogas plant in Spain
2004	Germany	Study	Preparation of a study on compression experiments with silage
2004	Germany	Laboratory test	Mentoring of laboratory tests for the fermentation of mother liquor from a dairy
2002	Germany	Technical-report	Feasibility-study on the construction of a biogas plant in Lower Saxony
2002	Italy	Study	Pre-study on construction of a biogas plant in Italy
